SUMMARY

Full-stack developer with 4 years of experience in building scalable web applications across recruitment, healthcare, and customer support domains. Proficient in developing and integrating APIs, optimizing system performance, and creating responsive user interfaces using React and Node.js. Seeking to leverage strong technical skills to contribute to innovative teams and impactful solutions in backend or full-stack roles.

WORK EXPERIENCE

Entiovi Technologies Private Limited

April 2025 - Present

Live Commerce Platform

<https://try.commentsold.com>

Worked as a React Native (Expo) developer on an e-commerce live selling mobile application, enabling real-time product sales through live video streaming and interactive user engagement. Built core features including live comments, instant add-to-cart, checkout flow, product catalog, inventory views, and order management with a focus on performance and mobile UX. Integrated real-time APIs/WebSockets, authentication, payments, push notifications, and deep linking, while optimizing the app for low-latency live commerce across iOS and Android platforms.

Creator-driven social commerce platform

<https://get.pop.store/>

Worked as a React.js Developer on Pop.store, a creator-focused social commerce and link-in-bio storefront platform, building scalable and high-performance web features using React.js, TypeScript, JavaScript, HTML, CSS, and REST APIs. Developed customizable storefront pages, product and digital content listings, subscriptions, affiliate links, checkout flows, and creator dashboards, with state management, analytics integration, and performance optimization to support creator monetization and audience engagement. Collaborated closely with backend and product teams to deliver responsive, conversion-optimized user experiences.

NLB Technology Services PVT LTD

Feb 2022 - Dec-2025

Applicant Tracking System (ATS) Development

<https://www.clearedtalent.com/>

As a full stack developer, I played a key role in creating an in-house Applicant Tracking System (ATS) that streamlined the recruitment process by automating functions like interview scheduling, candidate status tracking, and resume parsing. I utilized Node.js and Express for robust backend development, ensuring high scalability and performance.

To enhance user experience, I employed React to build a responsive user interface, allowing seamless navigation. I integrated MongoDB for efficient data management and implemented role-based access control (RBAC) for different user roles, such as recruiters and candidates. Leveraging RESTful APIs, I facilitated smooth communication between the frontend and backend, resulting in a 30% reduction in time-to-hire and improved overall hiring efficiency.

WORK EXPERIENCE

Healthcare Analytics Project

<https://acturealfrendenddev.z13.web.core.windows.net>

I contributed to developing a healthcare analytics platform that processes patient data to generate actionable insights based on specific cohort selections. I built the backend data pipeline using Node.js and Express for efficient handling of large datasets and integrated MongoDB for flexible, real-time querying of patient information.

To improve user interaction, I designed interactive visualizations with React and D3.js, creating user-friendly dashboards for healthcare providers to analyze trends and outcomes. This platform significantly aided in data-driven decision-making, enhancing patient care quality while ensuring compliance with data privacy regulations.

Support System with LLM-based Chatbot

I was involved in building a comprehensive support system that integrated a chatbot powered by OpenAI, supported by a Node.js backend, to assist users with requisition-related queries. For the frontend, I utilized React to create a user-friendly chat interface, which significantly enhanced the customer support experience.

PERSONAL PROJECTS

Customer Management System - Automotive

<https://crm.flywheelcars.com/>

Created a customers management system as a side project, integrating IVR technology to track communication, live inventory update and lead tracking. The system was later purchased by an automotive dealership, showcasing its effectiveness in streamlining the lead management process.

AniMash

https://github.com/MdWasimAslam/AnimeMatch_Frontend

Developed a web app inspired by Mark Zuckerberg's Facemash, where users can compare and rate anime characters. Implemented a dynamic UI for quick interactions and used a scoring system similar to the original concept, leveraging my frontend development skills.

DocuVerse

<https://github.com/MdWasimAslam/DocuVerse>

With DocuVerse, you can have a conversation with your PDFs! Simply upload your document, and our AI chatbot will help you find the information you need. It's like having a virtual assistant for your PDFs.

CERTIFICATES

- Software Development Trainee Certificate - Amcat
<https://www.myamcat.com/certificate/19266569/software-development-trainee/166>
- Fundamentals of Cloud Computing - UpGrad
<https://upgrad.certificate.givemycertificate.com/c/31a44763-b0c8-4057-a8e3-c162911bfb07>

KEY SKILLS

- React JS, React Native
 - HTML5, CSS3, JavaScript
 - Ant Design, Tailwind CSS, Material UI
 - Bootstrap, Redux
 - Responsive Web Design
- Node.js
 - Express.js
 - LLM
 - LangChain
 - API Development
 - Authentication & Middleware
- MySQL
 - PostgreSQL
 - PhpMyAdmin
 - MongoDB
 - Cosmos DB
 - Redis
 - Sqlite
- Git
 - GitHub
 - Docker
 - Vercel, Netlify, Heroku
 - Azure DevOps
 - Hostinger

EDUCATION

Master of Computer Applications University of Engineering & Management, Kolkata DGPA: 8.94	2020-2022
Bachelor of Computer Application Techno India Institute of Technology CGPA: 7.48	2017-2020
CLASS XII - BSEB Chandra Shekhar Janta College 58%	2017
CLASS X - ICSE Saifee Golden Jubilee English Public School 61%	2015

LANGUAGES

- English (Full Professional Proficiency)
- Hindi (Full Professional Proficiency)
- Bengali (Conversational, Understanding)
- Urdu (Conversational, Understanding)
